

SPARK

2011

OUR SECOND DECADE CRAFTSMEN AND COMPUTERS

Hugo Ripert, our founding partner delivered the first Spark model to clients in December 2000. He was running a company of one. Himself as the sole employee. Production and packaging was all subcontracted. Since then he has been joined by about 750 other people and we now do everything ourselves. Our range has widened from strictly contemporary Le Mans 1/43rd scale racing cars to include road cars, both current and classic, racing cars of all eras, Land Speed Record cars, concept cars, trucks and transporters, and the occasional aircraft and boat. We have also moved into different scales from the tiniest 1/87th through 1/43rd, 1/24th, 1/18th and even some 1/8th scale cars as special projects. We continue to manufacture models for our "sister" brands Bizarre and Le Mans Miniatures as well as for other brands and actual car manufacturers such as Audi, Mercedes, Porsche and Renault along with racing teams such as Aston Martin. Last year we started producing our first contemporary F1 cars and we believe that we have brought a new level of detail and quality to this type of model. This year we hope to do the same with rally cars...

We are continually on the look out for new techniques and materials to refine the appearance and detailing of our models. We continue to use hand assembled photo etching for delicate parts that we believe look far better than the much cheaper to produce injection moldings, with their often overscale thickness, still used by many of our competitors. We do not use a single plastic injection molding to represent all four windows in a car. We glue, scale thickness, individual windows, by hand, into each separate frame. It is a far more expensive production process but we think it worth it.

We are great believers in continuing with the traditions of hand made craftsmanship whilst combining them with modern technology. The prototypes from which we produce our production molds are a case in point. Some of these prototypes are carved entirely by human hand and eye employing traditional techniques used for generations in the carving of ivory, jade and precious metals. These craftsmen work from photographs, drawings and measurements painstakingly reviewed by people familiar with the car being modeled. The skill of these artisans is really remarkable. Other prototypes are generated entirely from data discs and computers directing 3D printing or stereo lithography machines. The data will have been generated either by the car manufacturer or alternatively from laser scans made of older cars predating computer aided design.

Either way we enjoy the process of choosing a car to be modeled, researching our libraries and photo files and following it through production in our ongoing efforts to bring you the best possible models in their price ranges.

Our Factory

As we have grown our factory from a few dozen people to nearly eight hundred, a constant challenge has been to produce what are essentially hand built kits into serially produced models on a production line. We are constantly seeking to integrate old fashioned, traditional craftsmanship with new materials and techniques. Whereas some processes were, in the past, outsourced we have been bringing more and more of them in-house. Our graphics department usually produces our own artwork for decals and pad printing from photographs that we take ourselves of the actual cars at race events or from old photos in our archives. Similarly we design photo etched parts designed to be folded "origami" style into various parts such as rear wing assemblies or even car interiors. These are more expensive to produce than injection molded pieces but the scale effect, to us, is worth the price.

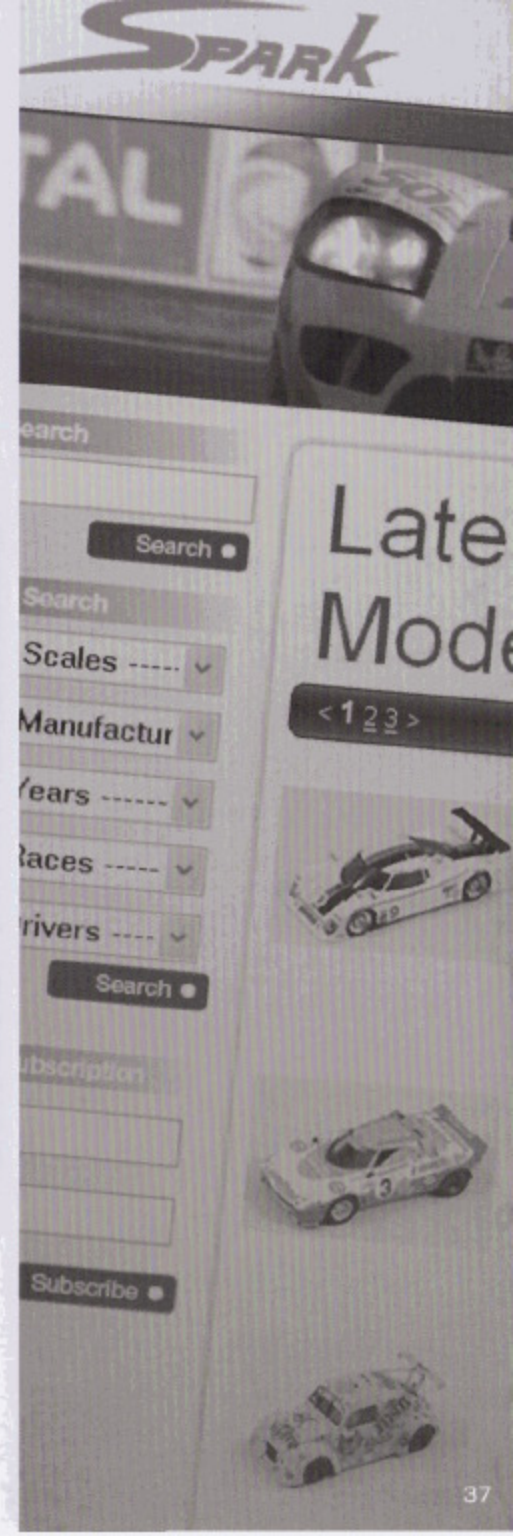

SUBSCRIBE TO OUR NEWS LETTER

That way you will receive emails with links taking you to directly to models that will be coming out soon as well as the very latest items that should already be in your favourite model shop. You can also find in the "OUR RANGE" page pictures and details of just about every model we have ever made.
