GOOD EYES AND STEADY HANDS

As we have often said before, our models are essentially "handbuilt" models made on specialized production lines where the assembly process is broken down into steps. Before assembly comes the production of a master pattern often carved by hand by people with enormous skill.

After moulding of parts comes; pre paint finishing, painting, assembly of the many tiny parts and the application of decals or pad printing. The models can be, and are, made in a variety of materials including diecast metal, resin, ABS, steel and aluminium. We have no prejudice or preference as to diecast metal or resin or indeed any other appropriate material.

The word to stress here is "appropriate". We will always use the materials that we think bring the most accurate possible representation of a car in miniature in any given price range.

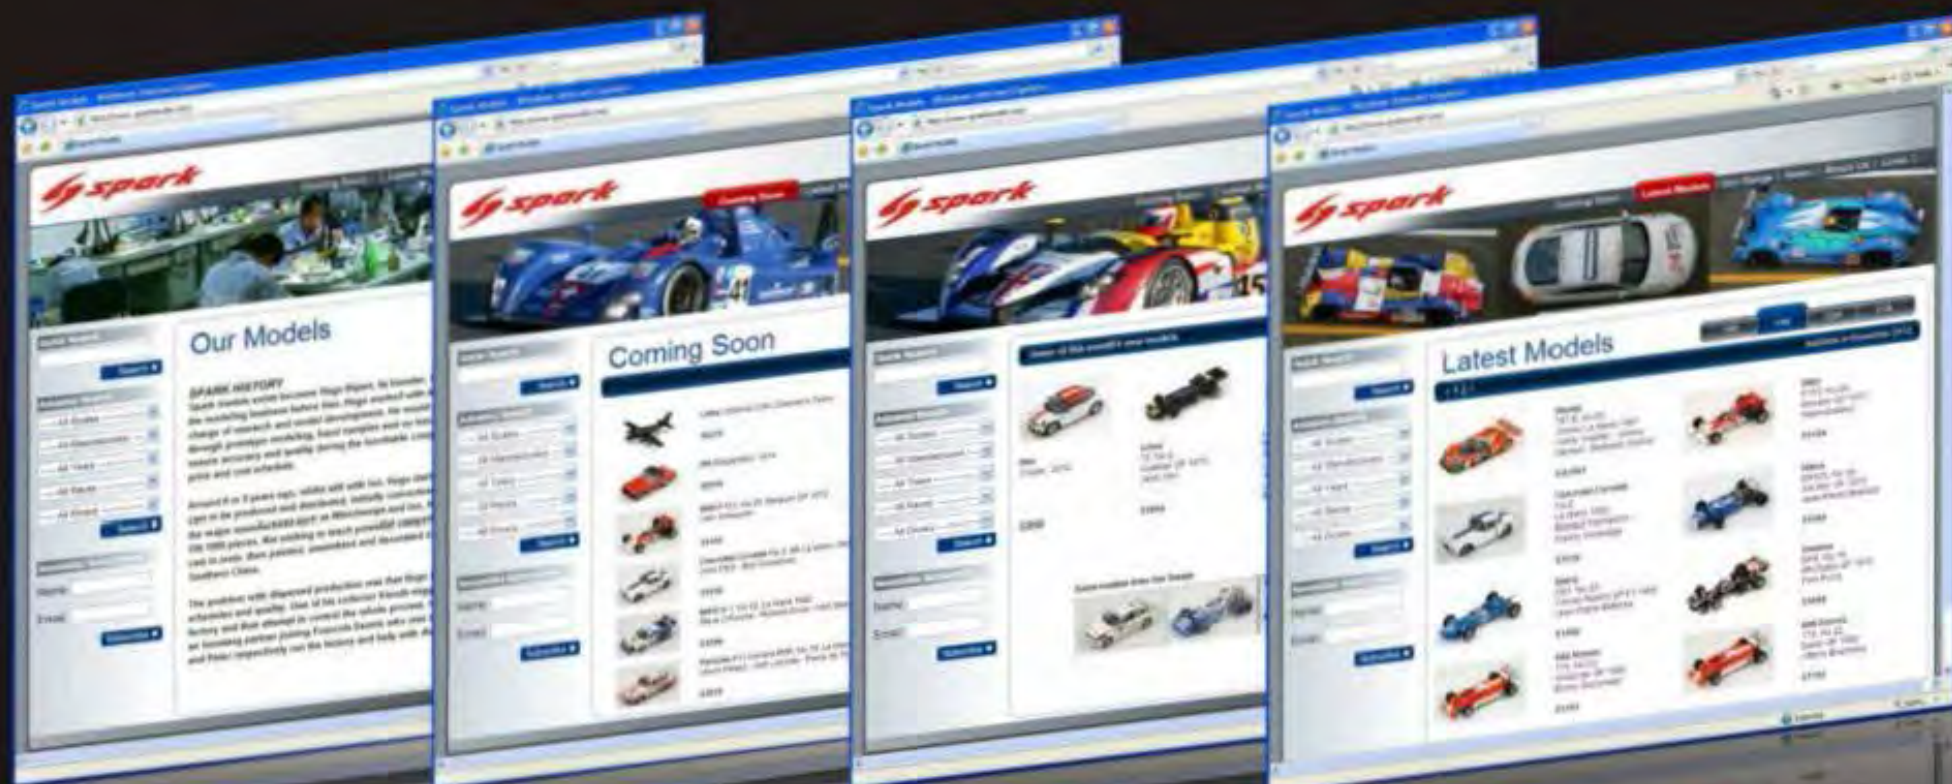

There has been a lot of nonsense both written and spoken about the relative merits of diecast metal and resin.

We have seen excellent models in both materials from a variety of manufacturers. We have also seen mediocre and even bad models in both resin and diecast. For a longer discussion on this subject go to our website and look up the News story entitled "A Lot Of Nonsense"

GO TO OUR WEBSITE AND SUBSCRIBE TO YOUR NEWS LETTER

That way you will receive emails with links taking you directly to models that will be coming out soon as well as the very latest items that should already be in your favourite model shop. You can also find in the "OUR RANGE" page pictures and details of just about every model we have ever made.
